**Adapt or Insure?**

Bonn, Germany,  
3 - 5 June 2011

# Adapt or Insure? three questions

- - What role does risk sharing/transfer through insurance play in the mix of policy and financial instruments supporting investments in resilient urban infrastructure?
- - What risk management solutions and innovative insurance products does the insurance industry offer to local governments striving for increased resilience of their city and community?
- - How can local governments best build cost-effective adaptation measures and insurance into their adaptation strategy?
